©Vera V. Mainz and Gregory S. Girolami 1998

Parfitt, Geoffrey Derek

1928 - 1985

DEGREE: PhD

DATE: 1955

PLACE: Bristol

TEACHER/RESEARCH ADVISOR: Eley

studied the physical chemistry of colloids and interfaces, esp. the dispersion of powders such as coal and pigments in liquids; studied the effects of charge stabilization, fluorination, silylation, impurities, and surfactants on the interactions of solids and liquids; investigated the surface chemistry and precipitation of oxides and silver halides; studied the adsorption of gases on surfaces and on microporous solids.
