Module 2 Exam Wrap-Up

Name:

Current exam grade:

Choose the problem from your exam where you lost the most points, or one where you got no points. Rework it for partial credit (7 pt) with the help of your neighbors if needed. Identify clearly which problem you are solving.

For extra credit (7 pt). Conceptual mapping: Start with the concept of Chemical Equilibrium. Draw ramifications from this concept showing how the topics we have studied derive from it. Include equations, solving methods, etc... to show how these topics are connected. Discuss with your classmates.

3 pt. What is the muddiest point so far?
