Swain, Robert Eccles          1875 - 1961

DEGREE: PhD   DATE: 1904   PLACE: Yale
TEACHER/RESEARCH ADVISOR: Mendel

investigated the environmental effects of the waste products discharged from the Anaconda Copper Mining Co. Greater Smelter in Montana, contributing to the understanding of problems associated with metallurgical smoke; undertook a national survey of smelter operations for the Dept. of Justice in 1909-1911 to determine their potential for injuring national forests; studied the relationship between industrial waste products and atmospheric pollution.

1. PhD advisor confirmed by footnote 1, Am. J. Physiology 1905, 13, 130.
3. Memorial Resolution, Stanford University, 6June 1961.
